II. Background

As part of its environmental mission, the Safer Choice program partners with businesses to help consumers and commercial buyers identify products with safer chemical ingredients, without sacrificing quality or performance. Toward this end, the Safer Choice program certifies products containing ingredients that have met the program's specific and rigorous human health and environmental toxicological criteria. The Safer Choice program allows companies to use its label on certified products that contain safer ingredients and perform, as determined by expert evaluation. The Safer Choice program certification represents a high level of achievement in formulating products that are safer for people and the environment. The purpose of the Partner of the Year Awards is to recognize the leadership contributions of Safer Choice partners and stakeholders who, over the past year, have shown achievement in the design, manufacture, selection, and use of products with safer chemicals, that further outstanding or innovative source reduction. EPA especially encourages submission of award applications that show how the applicant's work in the design, manufacture, selection and use of those products promotes environmental justice, bolsters resilience to the impacts of climate change, results in cleaner air or water, or improves drinking water quality.
